

Urban Space Wall Mount Bike Rack

Model Number

USWMBR-77

The Urban Space Wall Mount Bike Rack was born from a practical challenge: how to promote cycling while maximizing tight underground parking spaces. Developed in response to a client's request, this innovative bike rack offers a vertical storage solution that dramatically reduces the footprint—using only one-third the space of traditional ground-mounted racks. Ideal for underground garages, storage rooms, and other compact environments, the Urban Space rack takes advantage of modern lightweight bike materials, making vertical storage more accessible than ever. Simply lift and hook—no complex maneuvering required. To address concerns about security in less protected areas, the design includes an optional mounting bar, enabling riders to lock all major components (frame, wheels, and more) securely. This thoughtful feature gives cyclists peace of mind without compromising convenience.

Key Features:

- Space-Efficient Vertical Design: Stores bikes upright to optimize limited space
- User-Friendly: Accommodates modern lightweight bikes for easy lift and hang
- Secure Locking Bar (Optional): Enables full-bike security in unsecured areas
- Durable Construction: Built for long-term performance in demanding environments
- Versatile Application: Perfect for underground parking, condos, and storage areas

Material Specifications

Marine Grade Aluminum Frame
Stainless Steel Hardware
Super Durable Powder Coating
